Senior Full-Stack Software Engineer

8+ years of experience designing, developing, and deploying web, mobile, and game applications. Strong technical background in full-stack engineering, cross-platform mobile development, cloud infrastructure, and DevOps automation. Experienced in leading end-to-end delivery, system architecture, and performance optimization across multiple domains.

Core Competencies

- Frontend: React, Next.js, TypeScript, JavaScript, WebGL
 - Mobile: React Native, Expo, Flutter
 - Game Development: Unity (C#), WebGL
 - Backend: Node.js (Express), ASP.NET, Golang, Python, PHP
 - Cloud & DevOps: AWS, CI/CD, Docker, GitHub Actions
 - Practices: Agile/Scrum, TDD, System Design, Scalable Architecture
-

Professional Experience

Senior Full-Stack Engineer | Freelance / Remote

2019 – Present - Designed and delivered scalable full-stack applications for international clients in e-commerce, SaaS, and gaming. - Built cross-platform mobile applications with React Native and Flutter, integrated with REST/GraphQL APIs. - Developed multiplayer Unity WebGL games with real-time networking and backend services. - Migrated on-premise systems to AWS cloud infrastructure, implementing CI/CD pipelines with Docker and GitHub Actions. - Led architecture decisions, code reviews, and mentoring for distributed teams.

Key Achievements: - Architected and launched a multiplayer game platform (Unity + Node.js backend) handling thousands of concurrent users. - Reduced deployment cycle from weekly to daily releases through automated CI/CD pipelines. - Delivered over 20 successful client projects across web, mobile, and game platforms.

Software Engineer | Tech Companies & Startups, Ukraine

2015 – 2019 - Developed and maintained enterprise web applications using ASP.NET, React, and PHP. - Implemented REST APIs and microservices in Golang and Python. - Optimized application performance and database queries, improving load times by up to 30%. - Collaborated with product teams to deliver features in Agile environments.

Key Contributions: - Modernized a legacy system into a React + .NET Core stack, improving maintainability and scalability. - Built internal developer tools to automate testing and deployment, reducing manual effort by 40%.

Education

B.S. in Computer Science – [University Name], Ukraine

Projects (Representative)

- Multiplayer Scratch-like Game (Unity, WebGL, Node.js): Designed and built a browser-based multiplayer canvas supporting up to 4 players.
 - E-Commerce Mobile App (React Native, Expo): Cross-platform iOS/Android app with in-app purchases and Stripe integration.
 - Cloud Migration (AWS, CI/CD): Migrated enterprise web apps to AWS with containerization, improving uptime and scalability.
 - Productivity App (Flutter, Firebase): Offline-first architecture with cloud sync.
-

Languages

- English – Professional Proficiency
- Ukrainian – Native
